

Enabling collaborative review with the DSpace configurable workflow

items come via feeder system

RMS

deposit on submit/accept

workflow shared across multiple staff

IRR

- Author-supplied/early deposit metadata typically needs adjustment
- Early deposit submissions need to sit for months before they can be processed
- Often: wait for publisher/author response

Need better ways to manage workflow:

- “park” a submission without cluttering up the list of workflow tasks
- quickly see the status of a workflow task
- share task status across all reviewers

The AgResearch IRR review workflow

- Built using DSpace 5 configurable workflow
- Uses workflow actions, steps & outcomes to add state to workflow tasks
- Retains default actions: edit; reject; accept
- Adds ability to leave notes on workflow tasks
- Requires only 3 custom Java classes

Change stage / add note

Return to pool

Change stage / add note

Next stage:

Waiting for information

Select the next workflow stage for this task. You can leave it at this stage if you like. Regardless of the new you choose, the task will be returned to the pool.

Note pre-sets:

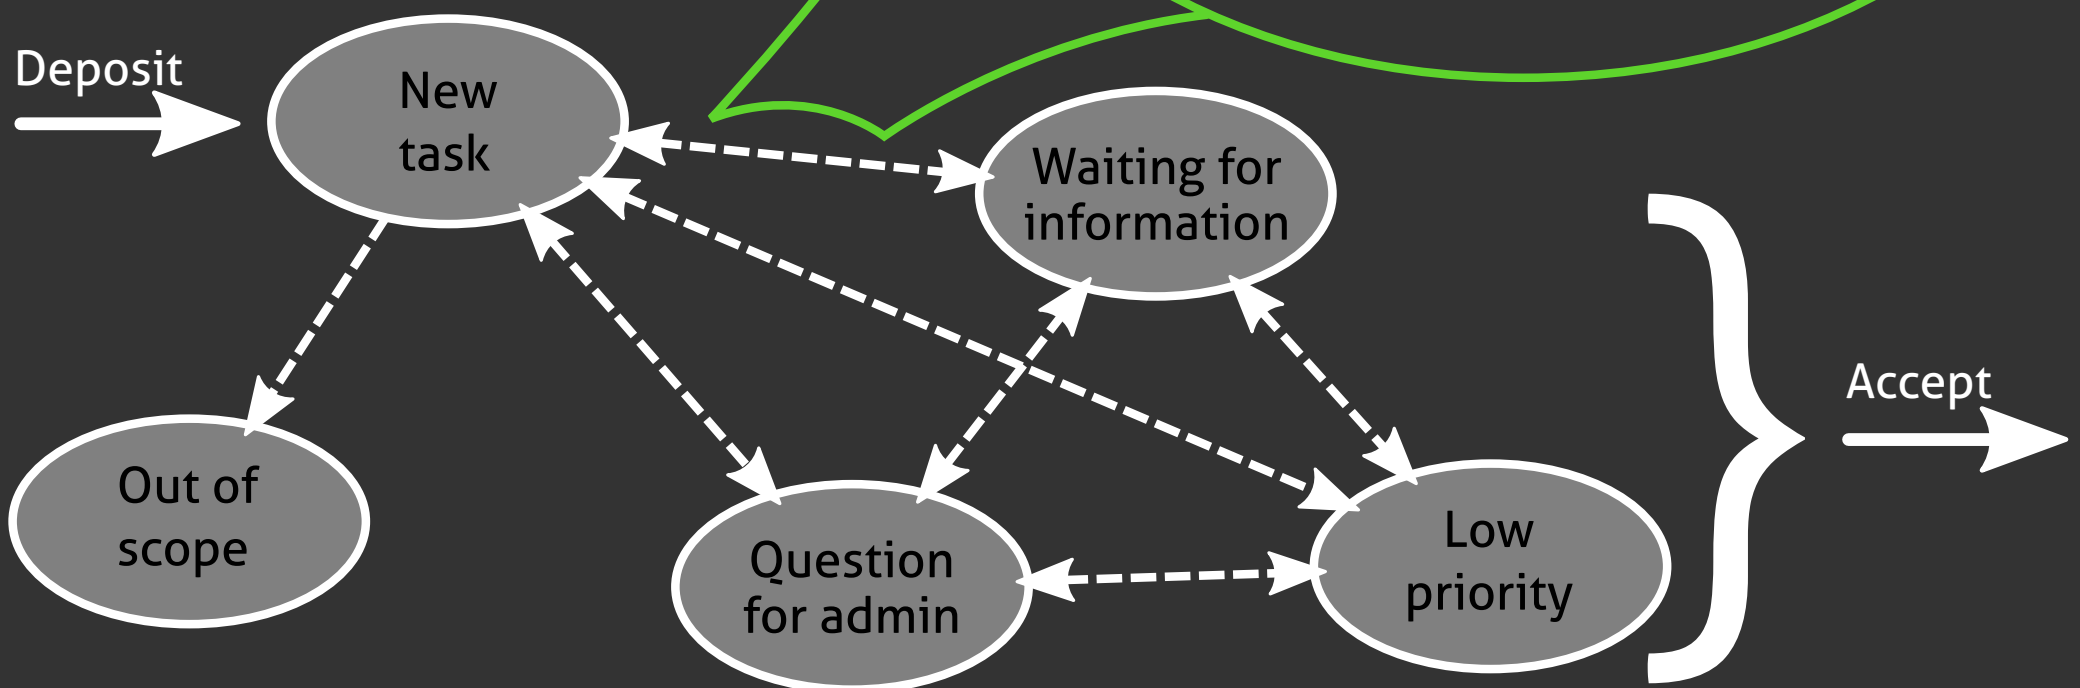

Waiting for formal publication

Note:

[2017-06-15, Andrea Schweer] Waiting for formal publication

Optionally, type in a note for your fellow AgScite administrators.

Confirm Cancel

Additional “Tasks in the pool” customisations

We made some additional tweaks to the DSpace submissions page

Tasks in the pool **73**

Click on a column header to sort the table by that column.

Search:

Stage	Title	Type	Notes
<input type="checkbox"/> Low priority	The Crystal Structure of Phosphosulfolactate Synthase (ComA) from Methanobrevibacter ...; OR 2877	Article	[2017-06-14, Deirdre Congdon] Article resubmitted; will advise when published
<input type="checkbox"/> New task	Pathological changes seen in horses in New; OR 4529	Article	
<input type="checkbox"/> Question for AgScite admin	Frontiers of sheep genomics in New Zealand; OR 2893	Conference	[2017-06-14, Deirdre Congdon] Submitter says abstract published
